PROGRAMMING TASK (L2 - MONDAY)

The following programming task must be completed during your lab period. If you need accommodation based on time zones, please contact the instructor.

A ThingSpeak channel has been setup for your lab period. Its API key is 54CDA6FJF4RCJ92C.

Write a Python program to perform one write to this channel with the following information

- Field 1: Your cmail email address (Please make this correct because it will be used to assign your mark)
- Field 2: Your Project Group (e.g. L2-M-3)
- Field 3: Your own individual member identifier (e.g. a or b or c or d)

The program must be called lab4.py. The program can run on either your Pi or your laptop. The program can be on Python 2 or Python 3.

Put your program on your personal Git repository in a new folder called Lab4.
